

How to Run This Project on Your Mac

What you need: Mac . VS Code or Cursor . Claude Code subscription

1. Install the tools (one-time)

VS Code -> <https://code.visualstudio.com>

or Cursor -> <https://cursor.com>

Python 3.11+ -> <https://www.python.org/downloads>

(Click the big yellow "Download Python" button)

2. Install Claude Code in VS Code / Cursor

1. Open VS Code or Cursor
 2. Click the Extensions icon in the left sidebar (looks like 4 squares)
 3. Search for Claude Code
 4. Click Install
 5. Sign in with your Anthropic account when prompted
-

3. Get the project

1. Open VS Code / Cursor
2. Press Cmd + Shift + P -> type Clone -> select "Git: Clone Repository"
3. Paste this URL:

```
https://github.com/techteampeer/lead-gen.git
```

4. Choose where to save it on your Mac -> click Open
-

4. Open Claude Code and let it set up everything

1. In VS Code / Cursor, open the Claude Code panel
 2. Type this message:

> Set up this project -- create a virtual environment, install all dependencies, and install Playwright
 3. Claude Code will run all the setup commands automatically. Just approve when asked.
-

5. Run the pipeline

In the Claude Code panel, type:

```
Run the lead gen pipeline
```

Claude Code runs the scraper across all job sources (Dice, Greenhouse, Lever, Ashby, Wellfound) and saves the results. This takes about 10-15 minutes.

6. Launch the dashboard

In the Claude Code panel, type:

```
Launch the dashboard
```

Claude Code starts a local server and opens the dashboard in your browser at:

```
http://localhost:8765/dashboard.html
```

You'll see all the scored and ranked leads ready to review.

That's it!

Every time you want fresh leads, just open the project and tell Claude Code:

```
Run the pipeline and launch the dashboard
```

Useful things to ask Claude Code

```
"Show me all companies with a score above 70"
```

```
"Which companies are HIGH urgency?"
```

```
"Add this job board as a new source: [paste URL]"
```

```
"Why did this company get a low score?"
```

```
"What happened in the last pipeline run?"
```
